Professional Summary

Full-Stack Developer with hands-on industry experience building production-grade applications using React, Node.js, and TypeScript. Delivered real-time, AI-integrated systems including a live chatbot platform and an ATS resume-scoring tool. Strong foundation in REST APIs, relational and NoSQL databases (MySQL, PostgreSQL, MongoDB), and scalable backend architecture, with a track record of fast learning and ownership in a live production team.

Technical Skills

Languages & Frameworks: JavaScript, TypeScript, React.js, Node.js, Express.js

Backend & Architecture: REST APIs, Authentication, JWT, OAuth (basic), Socket.IO, Microservices (basic), Rate Limiting

Databases: MySQL, PostgreSQL, MongoDB

Frontend: React.js, Tailwind CSS, Responsive Design

Tools & Cloud: Git, GitHub, Docker (basic), Postman, VS Code, XAMPP

Soft Skills: Problem-solving, ownership, cross-functional collaboration, written & verbal communication

Experience

Software Developer (Internship)

Zanthium Technosoft Pvt. Ltd.

Rudrapur, India
Nov 2025 – April 2026

- Built and shipped **30+ full-stack features** using React, TypeScript, Tailwind CSS, and Node.js, collaborating with a **2-3 person production team** to deliver live application updates
- Planned and implemented REST APIs and Socket.IO real-time features, enabling instant updates across the live application without page reloads
- Managed and queried the data layer across **6-15 tables/collections** spanning MySQL, PostgreSQL, and MongoDB, ensuring data consistency across relational and NoSQL systems
- Integrated **2-3 third-party APIs** via Axios and implemented client-side routing with TanStack Router, streamlining data flow between frontend and external services

Projects

AI-Powered Chat Bot – [Live Demo](#)

2026

React.js, Node.js, Express.js, Socket.IO, PostgreSQL, Grok API

- Built a full-stack real-time chatbot with Socket.IO and PostgreSQL, implementing transactional message persistence and a **1-hour TTL FAQ cache** to reduce redundant database queries
- Integrated the Grok API (Llama 3.1) for context-aware responses, maintaining the **last 10 messages** of conversation history per chat for contextual continuity
- Automated production reliability with cron jobs: daily data cleanup and a **5-minute keepalive ping** to prevent server idling

AI Resume Analyzer – [Live Demo](#)

2026

React.js, Node.js, Express.js, REST APIs

- Engineered a deterministic ATS-scoring engine across **6 weighted categories** (Contact, Experience, Skills, Education, Projects, Format) using a fixed point-based rubric
- Implemented server-side score validation that re-derives the final score from category breakdowns, preventing AI score hallucination and ensuring **100% rubric-consistent** results
- Built a PDF parsing pipeline extracting and processing resume text, integrated with Groq's Llama 3.3 70B model at **zero temperature** for fully deterministic output

Weather App – [Live Demo](#)

2025

React.js, Tailwind CSS, Weather APIs

- Built a real-time weather dashboard using **React, TypeScript, TanStack Start, and Tailwind CSS**, integrating **WeatherAPI (REST)** for live weather, hourly/7-day forecasts, and air quality data.
- Implemented geolocation-based detection and multi-city search with a responsive, mobile-friendly UI and reusable component-based architecture.

Education

Bachelor of Computer Applications

Uttarakhand Open University

Haldwani, India
Aug 2025 – Present

Diploma in Computer Science & Engineering

Government Polytechnic Kashipur

Kashipur, India
Aug 2022 – May 2025
